AI TECH DIRECTOR | AI TRANSFORMATION LEADER | CONSULTING DIRECTOR

Bridging Boardroom Strategy, Enterprise Multi-Agent Architecture, and Mission-Critical Production Delivery

Executive technology leader and former Director of Consulting with 20+ years of experience leading enterprise digital transformations, architecting large-scale software systems, and building AI-driven platforms. Combines C-suite/CTO-level advisory presence with hands-on systems engineering in generative AI, multi-agent orchestration, RAG architectures, and model evaluation. Track record spans authoring nationwide technology blueprints, deploying systems serving 13M+ citizens and 40,000+ professionals, raising \$3.8M+ in venture/angel funding, and securing \$200K in tier-1 AI credits (OpenAI, Microsoft, Google, AWS). Creator of the VWOOSH platform and author of the foundational manifesto *"AI's Judgment Day: A Leader's Guide to Building a Judgment-as-a-Service Firm"*. Fluent in translating ambiguous business problems into working, production-ready AI solutions that satisfy rigorous governance, security, and commercial ROI standards.

CORE CAPABILITIES & TECHNICAL TOOLKIT

- Executive & Commercial Leadership:** Boardroom AI Advisory, C-Suite/CTO Alignment, Digital Transformation Strategy, Technical Pre-Sales & Pitch Leadership, Scoping & Budgeting, Venture Building, Practice Mentorship.
- AI Systems & Agentic Architecture:** Multi-Agent Systems (MAS), Socratic Onboarding Engines, Spec-First Engineering, Human-in-the-Loop (HITL) Governance, LoRA Fine-Tuning, Guardrails, Traceable Reasoning.
- Retrieval & Knowledge Engineering:** Advanced RAG, Semantic Chunking, Vector Databases, Context Engines, Embeddings, Knowledge Graphs (DocGraph), Evaluation Frameworks (Deterministic Quality Gates, Hallucination Audits).
- Prototyping & Engineering Stack:** Hands-on development in Python, TypeScript, REST APIs, Agentic Frameworks, Vector DBs, Prompt Engineering & Automated LLM Evaluation Pipelines.
- Cloud, DevOps & Production Oversight:** Deployment and architectural oversight across Azure AI Foundry, GCP Vertex AI, AWS, Docker, CI/CD pipelines, Git workflows, OpenEHR, HL7/FHIR.
- Governance, Security & Compliance:** Responsible AI, GDPR, EU AI Act, ISO 27001, HIPAA, Software as a Medical Device (SaMD) regulatory standards, Tenant Data Isolation, EU Sanctions Compliance (Reg. 833/2014).

SELECTED HIGHLIGHTS & QUANTIFIED IMPACT

- Nationwide Enterprise Scale:** Authored the National Digital Health Blueprint adopted by the Ministry of Health; spearheaded introduction of the OpenEHR cloud platform for Moscow's healthcare infrastructure, now serving 13M residents and 40,000 physicians (the largest OpenEHR deployment globally).
- High-Velocity AI Prototyping:** Personally architected and shipped full-stack multi-agent prototypes in 2-week sprints, moving directly from ambiguous problem framing to interactive, tested solutions with zero external agency costs.
- High-Throughput Clinical AI in Production:** Co-founded MiraMedix and led development of the Multidisciplinary Virtual Tumor Board (VTB), processing 3,000+ complex oncological cases weekly; engineered a production AI assistant leveraging custom LoRA-adapted models (successfully executed full equity exit in May 2026).
- Strategic Corporate Partnerships & Exits:** Co-founded health-tech venture Laboratory ELEMENT, scaling clinical decision support and SaMD engines across major regional health networks; established commercial localization partnerships with Wolters Kluwer (UpToDate, Medispan); successfully executed exit of ElmPLAT platform to a European systems integrator.

PROFESSIONAL EXPERIENCE

VWOOSH Platform (Architecture & Prototyping Initiative), Amsterdam, The Netherlands 2023 – Present

Creator & Principal AI Systems Architect

Pioneered the Judgment-as-a-Service (JaaS) operating model and multi-agent prototype infrastructure (<https://vwoosh.com/>)

- Architected the VWOOSH Multi-Agent Platform:** Designed a domain-agnostic, spec-first operating system for expert navigators, featuring automated Socratic onboarding, multi-lens adversarial red-teaming, and rapid prototype generation.
- Built End-to-End Enterprise RAG Pipelines:** Developed proprietary algorithms for semantic document chunking, episode-based data structuring, and multi-tenant contextual retrieval with air-gapped tenant data isolation.
- Authored Industry-Standard Specifications:** Designed 10-zone Johnny.Decimal knowledge schemas and automated prompt harnesses bridging executive intent to deterministic multi-agent execution.

MediXSpace B.V., Amstelveen, The Netherlands July 2021 – Present

Founder & CEO

AI-powered clinical decision support and healthcare knowledge infrastructure (Doctor's Notebook / OneXCare)

- Secured Competitive Global AI Grants:** Selected for competitive startup acceleration programs by OpenAI, Microsoft for Startups, Google Cloud (Vertex AI), and AWS, securing ~\$200K in compute and advanced LLM resources.
- Hands-on Delivery & Governance:** Spearheaded development of clinical AI prototypes; supervised security, clinical validation, and compliance roadmaps conforming to ISO 27001 and GDPR; raised \$800K in angel funding.

Founder & CEO (Merged into MediXSpace B.V.)

Enterprise middleware platform for seamless localization and clinical decision support integration into health records

- **Strategic Partnership with Wolters Kluwer:** Partnered with Wolters Kluwer Health to localize their flagship Medispan drug-interaction engine; influenced Wolters Kluwer to build non-English interfaces for UpToDate.
- **Measurable Clinical & Operational Impact:** Deployed automated alerting systems where 40% of alerts prompted immediate clinical adjustments, significantly improving patient safety and operational compliance.
- **M&A and Cross-Border Sale:** Negotiated and executed the sale and intellectual property transfer of ElmPLAT to a European systems integrator; supervised full localization and regional rollout in Slovenia.
- **AI-Driven Regulatory Automation:** Streamlined the cross-border merger of ElmDoc into MediXSpace by leveraging early LLM document synthesis workflows to process 500+ pages of Dutch regulatory filings, securing government approval with zero external legal fees.

Co-Founder & AI Systems Architect (Full Equity Exit Completed)

Oncological collaboration and clinical decision-support platform

- **Scaled Mission-Critical SaaS Infrastructure:** Pioneered the Multidisciplinary Virtual Tumor Board (VTB), currently coordinating collaborative oncological care across municipal healthcare networks for 3,000+ patient cases per week.
- **Engineered Custom LoRA AI Assistant:** Prepared domain-specific training corpora, fine-tuned LoRA model adapters on clinical guidelines, and led an engineering team to deploy a production-grade AI assistant assisting oncologists during case reviews.
- **Capital Formation & Clean Exit:** Contributed to securing \$3.0M in venture seed funding; completed full equity exit in May 2026 with zero ongoing operational or governance ties.

Co-Founder & Shareholder (Operational R&D concluded December 2021)

Healthcare IT venture focused on clinical decision support and regulatory software

- **Regulatory Certification (SaMD):** Directed R&D and led clinical software through SaMD (Software as a Medical Device) certification, securing regional public healthcare deployments and national sports medicine rule engines.
- **Enterprise Integration:** Established automated cloud-based drug-interaction and contraindication screening engines leveraging ElmPLAT (ElmDoc B.V.) and Medispan (Wolters Kluwer).
- **Passive Holding Status:** Concluded all active operational and engineering leadership in December 2021; continue to hold passive non-executive equity with zero operational, consulting, or management services provided since 2021.

Director of Consulting (Digital Transformation & Technology Practices)

Progressed from senior business analyst to Practice Director leading high-stakes technology strategy and implementation

- **Architected National Technology Blueprint:** Authored the National Digital Health Blueprint (2006) commissioned and adopted by the Ministry of Health, establishing the enterprise architectural standards for a multi-decade modern digital infrastructure.
- **Delivered Global Benchmark Cloud Implementation:** Led the strategic introduction and integration of the open-standard clinical platform (Marand / Better.Care) for the capital city's medical network, serving 13M residents, 40,000 physicians, and 90% of healthcare facilities (recognized internationally as the largest OpenEHR deployment).
- **Commercial & Delivery Leadership:** Acted as lead technical authority in complex competitive bids, RFP defenses, and boardroom negotiations; managed multidisciplinary delivery practices comprising 50+ consultants, software architects, and data engineers.

EDUCATION & ACADEMIC HONORS

Honors: US National Outstanding Master's Thesis Award (American Agricultural Economics Association: AAEA; NAREA).

International Post-Graduate Studies: Charles University (Prague, Czech Republic), Kenyon College (Ohio, USA).

PUBLICATIONS & THOUGHT LEADERSHIP

- **"AI's Judgment Day: A Leader's Guide to Building a Judgment-as-a-Service Firm"** (Medium, July 2025): Prescient manifesto on the economic obsolescence of the billable-hour consulting pyramid and the rise of Epistemic Navigators and outcome-based Judgment-as-a-Service (JaaS).
- **"Epistemic Navigation: A Conceptual Framework for Human Judgment in the Age of AI"** (Medium, May 2024): Formalization of structured reasoning discourse and cognitive navigation between human domain leaders and LLMs.
- **"A Universal Discourse Core: A Proposed Cognitive Infrastructure for AGI"** (Medium, June 2024): Exploration of multi-agent debate and reasoning protocols for reliable knowledge synthesis.

LANGUAGES, RESIDENCE & COMPLIANCE STATUS

- **Citizenship & Residency: Dutch Citizen (EU) |** Permanent resident of **Amstelveen, The Netherlands**; fully authorized for permanent employment and B.V. corporate contracting across the Netherlands and the European Union.
- **Languages:** English (Bilingual / Fluent Professional), Russian (Native), Dutch (Basic), German & French (Basic reading).
- **Sanctions & Regulatory Compliance:** 100% compliant with EU Council Regulation 833/2014 (Art. 5n); all operational and advisory consulting activities in the Russian Federation ceased prior to EU sanctions prohibitions; completed full exit from Russian venture equity (MiraMedix exited in May 2026); no operational, management, or consulting ties to Russian entities.
